Focusing on our school we have two different groups of higher education courses:

- Computing Studies
- Administration and Finance Studies

Our School is located in the south mediterranean coast of Spain and it is a perfect destination for tourists all over the world. Students in our school then have the opportunity to broaden their horizons since they have easy acces to foreign people and languages.

The Institution has required knowledge and capacity to deal with foreign partners and enterprises which best cope with our sutdents.

This course 2012-2013 the cooperating countries which have been selected or reelected, in some cases, are those which did not cause any kind of trouble to our participants nor to the Institution itself in the previous years. The selected partners have demonstrated to be serious, respectful and hard workers and, therefore, the possibility to keep on working together. The central group always considers the best options taking into account our situation and our praters'.

With Our inclusion in the Programme we expect to:

- improve our education by sending our students abroad. Sutdents are able to work in different environments, countries, cultures...
- promote mobility and therefore be a means for those who want to broaden horizons in terms of culture, working skills, etc.
- Create a sense of opening our student's eyes to other education possibilities.
- Strengthen the student's self-awareness
- Encourage students to be involved in different cultures and therefore establish links between them which make them feel closer and work as if they were a unique entity and destroy all possible barriers.
